Weddings

pricing effective 1 January 2010

Wedding photography combines elements of everything that I love about my art. First and foremost, I am a portrait photographer, and so weddings allow me to explore this great passion. I am extremely versatile, love location work, and thrive under pressure. I always work with an experienced assistant, which helps the day run smoothly. My mature, efficient style, quiet confidence and classic approach to weddings result in photographs steeped in beauty and elegance.
